Please join us for our *first* workshop

Wednesday, November 5, 2014

9:00 AM – 12:00 PM

Building 35, Room 610, NIH Main Campus, Bethesda

Keynote Speaker

Barry Taylor

Cancer genome discovery in an age of precision oncology

Memorial Sloan Kettering Cancer Center

Eric Tran

Toward adoptive T-cell therapy against patient-specific mutations in metastatic gastrointestinal cancers

Surgery Branch, CCR, NCI

Paula Hyland

The methylation landscape of noncoding components in lung tissue

Genetic Epidemiology Branch, DCEG, NCI

Julia Oh

Biogeography and individuality shape function in the human skin metagenome

Translational and Functional Genomics Branch, NHGRI

Clara Bodelon

Methylation profiling to evaluate etiological heterogeneity of ovarian cancers

Hormonal and Reproductive Epidemiology Branch, DCEG, NCI
