**DATE:** Monday, October 26, 2015  
**TIME:** 1:30 PM – 2:30 PM  
**LOCATION:** 2-3330

## Therapeutic Misconceptions and Misestimations in Oncology: A Clinical Trial Nurse's Guide

*Facilitated by: Chrissy Bryla, RN, MSN and Corinne Keen, RN, MS*

### **Objectives:**

1. Discuss the differences between therapeutic misconception and therapeutic misestimation.
2. Describe ways the Research Nurses can help prevent therapeutic misconception and misestimations.

### **Discussion Questions:**

1. Did you find article useful?
2. What is the practice, education, administration, or research question the author is trying to answer?
3. Why is it important to the Research Nurse?
4. Can you share your experiences regarding therapeutic misconceptions and misestimations?
5. How can the Research Nurse better ensure that the patient has a good understanding of what the clinical trial is about/the purpose of the clinical trial?
6. How can the Research Nurse reduce the likelihood of therapeutic misconception or misestimation in the informed consent process?
7. How will you put into practice some of the recommendations to lessen therapeutic misconception and misestimations?
