Position Description:

A postdoctoral position is available in the Laboratory of Human Carcinogenesis (LHC) to study genetics, genomics and biochemical pathways related to human liver cancer. Interested candidates should have a Ph.D., M.D., or equivalent degree with no more than 5 years of post-doctoral experience in cancer biology. The appointment duration is up to 5 years. Stipends are commensurate with education and experience. A highly motivated individual with a strong background in molecular biology, biochemistry, genetics, immunology, molecular epidemiology or a similar field is encouraged to apply. Experience in genome-wide assays or bioinformatics is an additional asset. Qualified candidates should also have strong communication skills, and a strong record of scientific achievement through peer-reviewed publications.

To Apply:

Interested individual should send a 1-2 page statement of research interests, career goals, a current CV and contact information for three references to:

Xin Wei Wang, Ph.D.
Chief, Deputy Chief, Laboratory of Human Carcinogenesis
Center for Cancer Research, National Cancer Institute, National Institutes of Health
E-mail: xw3u@nih.gov
